

SILICONE STAMPING DIES UNMATCHED EFFICIENCY & QUALITY

Clear Market Leader

Silicone stamping dies provide high impact visual performance with foils as well as transfer labels. They excel at conforming to surface variations and require reduced stamping pressure (compared to metal dies). CER silicone stamping dies stand out for their market-leading efficiency and quality.

Market-Leading Efficiency

Magnetic Quick-Change Option

- Unique-in-the-market
- Tool-less die changes in less than 5 minutes!
- 50% improvement in mounting accuracy
- No loss of magnetism over time
- Enhanced user safety

Re-coatable Option

Select silicone dies can be re-coated for repeatable use—**generating significant cost savings**

Quick Turn Around

Market-leading expertise and capacity allows CER to provide **quick die turn around**

Market-Leading Expertise

- **Eliminate Voids**
 - die texturing/screening
 - strategic die relief
- **Graphic Arts Expertise**
 - decades of experience in best practices
- **Die Finishing**
 - “ready to use” dies
 - hole drilling, matching dovetail & special trims

Market-Leading Quality

| Superior Silicone Formulations | Precision Molds | Superior Silicone-Metal Bond |
|--|---|--|
|  <ul style="list-style-type: none"> • variety of formulations • superior heat resistance (up to 550°F) • superior heat recovery |  <ul style="list-style-type: none"> • CNC machine engraved molds • High precision machine engraved molds offer superior repeatability and multi-relief capability |  <ul style="list-style-type: none"> • Proprietary (adhesive-free) silicone-to-metal bonding provides highly durable and mess-free bonds |

Market-Leading Range

| | |
|------------|---------------------------------------|
| Shapes | Flat, Contoured, Crowned, Multi-Level |
| Engraving | Photo-Etched, Machine-Engraved |
| Durometers | Single or Dual |
